

# 98 Degrees, The Way You Do

You've heard this a thousand times before  
I'm in love with you  
You'll hear it at least a million more  
Baby that's the truth  
It's the small things that endear me  
Every time that you are near me

The way you laugh at what I say  
The way you look at each new day  
The way your tears fall right on cue  
That's what I love about you  
Nobody else knows me by heart  
Takes me where I can reach the stars  
Makes me believe in love  
The way you do

You see in me the man that I can be  
And I'm thanking you  
You've given me all I ever need  
All I wanted too  
I know how blessed I am  
Girl, you are my best friend

The way you laugh at what I say  
The way you look at each new day  
The way your tears fall right on cue  
That's what I love about you  
Nobody else knows me by heart  
Takes me where I can reach the stars  
Makes me believe in love  
The way you do

The way you do  
You gotta listen, baby

The way you laugh at what I say  
The way you look at each new day  
The way your tears fall right on cue  
That's what I love about you  
Nobody else knows me by heart  
Takes me where I can reach the stars  
Makes me believe in love  
The way you do

The way you do  
The way you do
