98 Degrees, The Way You Do

You've heard this a thousand times before I'm in love with you You'll hear it at least a million more Baby that's the truth It's the small things that endear me Every time that you are near me

The way you laugh at what I say
The way you look at each new day
The way your tears fall right on cue
That's what I love about you
Nobody else knows me by heart
Takes me where I can reach the stars
Makes me believe in love
The way you do

You see in me the man that I can be And I'm thanking you You've given me all I ever need All I wanted too I know how blessed I am Girl, you are my best friend

The way you laugh at what I say
The way you look at each new day
The way your tears fall right on cue
That's what I love about you
Nobody else knows me by heart
Takes me where I can reach the stars
Makes me believe in love
The way you do

The way you do You gotta listen, baby

The way you laugh at what I say
The way you look at each new day
The way your tears fall right on cue
That's what I love about you
Nobody else knows me by heart
Takes me where I can reach the stars
Makes me believe in love
The way you do

The way you do The way you do
