A Bird A Sparrow, Ten And Two

Erase these dreams I never had It turns again but never look back We'll never go back Delete these sheets I failed to save Words cant describe the day And I cant speak tonight Never look back Never hold back Gotta get back To the places we once loved So I can sleep tonight Embrace these streets ive never crossed It turns again and we might be lost But we're well on our way We lost our way back home And we drive around for miles Just to see the open road I can see it comin Lets keep driving Just keep driving Lets keep driving Just keep driving We've gotta find our way home
