

# Alabama, We Made Love

We were all we ever wanted  
Before there was a single brick in this wall  
That keeps the distance here between us  
We built a life but we forgot we already had it all  
When we made love, we made love  
Baby we had something  
That nothing else could touch  
We made love  
Through the lonely that divides us  
And I can feel you reachin' from the other side  
Let's tear this wall down and start over  
And get back to oh that simple life  
When we made love and we made love  
Baby we had something  
That nothing else could touch  
And we made love  
We're just past the doubt  
Beyond the hurt  
We're not too far  
From where we were  
When we made love, we made love  
Baby we've got something  
That nothing else can touch  
When we made love
