## Alastis, Bring Down

Everything falls down around you Everything falls down within you Everything's so dark in your mind Hopelessness brings down all spark of your pride

You feel...so bad ...Useless

Everything falls down around you Everything falls down inner you Mysterious power...beyond darkness The light

You feel...so bad ...Harmful

Now you're welcome in our world You can feel the truth, toward the Death Now you're welcome in our despair Down, down darkest abysses

Everything, falls down Everything, so dark Everything, falls down Hopeless, brings down
