

Albert Hammond, I'm A Camera

Every night I look for a new girl
Nocturnal man in a neon world
And I love my job 'cause it is so easy
I'm a picture-taking Romeo
Will you pose for me in my studio?
Won't you do the things that you know will please me?

I'm a camera with an eye
To take your picture and make you famous
Put your face out there for the world to see
I'm a camera, very sensitive
And I want to develop your negative
All you got to do is relax with me

Let your hair down, girl, let me see you
Any way you move is a pretty view
And I love the way you expose your beauty
Turn your body 'round for a side shot
Black and white is fine and it's all I got
But I know your pictures will be so pretty

I'm a camera with an eye
To take your picture and make you famous
Put your face out there for the world to see
I'm a camera, very sensitive
And I want to develop your negative
All you got to do is relax with me

I'm a camera with an eye
To take your picture and make you famous
Put your face out there for the world to see
I'm a camera, very sensitive
And I want to develop your negative
All you got to do is relax with me

I'm a camera ... see the flash!
