Alice Cooper, Deeper

We must complete the trip Try not to lose your grip No sight of solid ground and never look straight down Deeper, deeper, deeper your claustrophobic brain Sucking you down the drain The walls are closing in The air is getting thin The elevator broke It went right through the floor It left a burning hole Down and down and down we go Were in a deadly spin Hating this spin were in Were helpless Panic grows Down and down and down we go Daylight is at an end Youll never see again Youll soon embrace the sight This cold eternal light
