

# Alicia Keys, Love Is My Disease

When your gone it feels like,  
My whole worlds gone with you  
I thought love would be my cure  
But now it's my disease  
I try to act mature  
But I'm a baby when you leave  
How can I ever get used to being without you  
(Yeah)  
Baby, baby, baby, baby  
In my addictive  
When I need you here all the time  
And I'm not sure if this is healthy  
Is it a sickness  
Cause I feel like I'm losing my mind  
And I know that there's no medicine  
Nothing I can take, no remedy  
Baby please stay  
(Ohohohh)  
When your gone it feels like,  
My whole worlds gone with you  
I thought love would be my cure  
But now it's my disease (my disease)  
I try to act mature  
But I'm a baby when you leave  
How can I ever get used to being without you  
Oh oh oh baby baby baby baby  
I get a fever  
Just the thought of you leaving my side  
Ohohhhh  
It's not the same till your back holding me  
That's all I need  
(Oh yeah)  
When your gone it feels like (when your gone baby)  
My whole worlds gone with you (gone with you)  
I thought love would be my cure  
But now it's my disease (my disease)  
I try to act mature  
But I'm a baby when you leave  
How can I ever get used to being without you  
Woahhwoah  
Heres what I'm going through when your gone  
Some serious symptoms of withdrawal  
(Ohohoh)  
So sick of turning in my bed  
Waking up drenched in a cold sweat  
(Ohohoh)  
Lying here lonely for you  
What am I suppose to do  
When I'm stuck and I can't get enough of your lowvvee  
Ohohohwoahhhh baby  
When your gone it feels like (when your gone baby)  
My whole worlds gone with you (gone with you)  
I thought love would be my cure  
But now it's my disease (my disease)  
I try to act mature  
But I'm a baby when you leave  
How can I ever get used to being without you
