Alien Ant Farm, Death Day

I slowly shoot these words like weapons

And go insane

I watch you drive your stupid car

You go away

You never were one to use caution

And you're gonna pay

You know I love to see it happen

I always tried to keep you near me

Without the pain

I love to tie us into knots

We slipped away

I tried to captivate you, on that evening

He was leaving, with the girl I love to kill

Happy Death day to you baby

I know youe flying in the blue now

Wel be together real soon now baby, don you worry

Papa got a brand new body bag for you

Cable cars run through my mind

Reminiscent Bay

I think of north on Valentine

I wish you'd stay

You never were one to use caution

It slipped away

I somehow knew this would happen

Happy Death day to you baby

I know youe flying in the blue now

Wel be together real soon now baby, don you worry

Papa got a brand new body bag for you

And I got a fresh new kind of attitude

I slowly shoot these words like weapons

And go insane

I watch you drive your stupid car

You go away

You never were, you never were

You know I love to see it happen

Happy Death day to you baby

I know youe flying in the blue now

Wel be together real soon now baby, don you worry

Papa got a brand new body bag for you

And he ain ever ever coming back to you
