## Alkaline Trio, Live Young, Die Fast

It's no big surprise we turned out this way It's in our eyes like shallow graves But we are one with the larvae and dirt We don't discriminate at all for what it's worth So live young, die fast No one will last So sit back and relax, enjoy the crash You fade into black and you're gone (It fades into black then it's gone) Live young, die fast The uneasy life, an untimely death This doesn't work at all for me so save your breath You took your time, stashed it away Deep down inside of a cardboard box marked "rainy day" I feel a miracle in every breath that I breathe Won't let this miracle end in tragedy I sense a miracle in all that I see Won't let this miracle slip away from me
