

# All-4-One, Goodbye

All-4-One

All-4-One...Has Left The Building

Goodbye

You don't have to hurt me no more

You've done quite fine my love

Left my heart here on the floor

You don't have to worry no more

Cause I understand that you

Know in your heart that we are through

It's been so long since I

Looked in our eye's and knew you

How did it come to this when a love so rich

Can hurt you so bad

I know that you, you feel it too

Cause there's nothing left but goodbye

Please say goodbye

You don't have to hurt me no more

You've done quite fine my love

Left my heart here on the floor

You don't have to worry no more

Cause I understand that you

Know in your heart that we are through

It's just so hard for me

To find the strength

To get through this

Sometimes I play this game

And I call your name hoping that you hear my cries

How could it be

No you and me

Now there's nothing left but Goodbye

I can't say Goodbye

You don't have to hurt me no more

You've done quite fine my love

Left my heart here on the floor

You don't have to worry no more

Cause I understand that you

Know in your heart that we are through

This crazy word Goodbye

Can make you laugh and make you cry

And it broke my heart in two

Hearing it from you
