

All Ends, Stil Believe

I need to leave it all behind
Caus' straight ahead with open eyes
Surround myself with all the love i deserve
i tried to help you understand
you need to breathe again
Don't let me die
Now i'm standing here
and i know what's right
I see that you still believe
though its been hard
it will hurt no more
'cause i always will believe
I tried to find my strength again
remember the times i wait for fool
and never turned my light
I won't give up
You know I'm always by your side
Whereever you will go
I'm right behind
Now i'm standing here
and i know what's right
I see that you still believe
though its been hard
it won't hurt no more
'cause i always will believe
I never thought i would feel the same
just feel my trust and i show the way
Now i'm standing here
and i know what's right
I see that you still believe
though its been hard
it will hurt no more
'cause i always will believe
Now i'm standing here
and i know what's right
I see that you still believe
though its been hard
it will hurt no more
'cause i always will believe
