

Amaranthe, Fearless

With the speed of light I'm letting no tomorrow stop me
Like a razorblade cutting through your veins
I consume all the life within you
I transcend the madness I'm beyond all premonition
Suddenly I, I ascend to the skies
Without wings you fall from grace
A million stars I pass
I speed towards the heavens
To let me feel divine again

Out of the dark, into the sun
I'm in a higher state of mind
A brand new start
I will transform into the fearless
A stronger force above the ground
The radiant era has begun
Out of the dark, into the sun
'Cause now I'm fearless

Like a force of nature rise to ultimate dominion
Like a race against all the times you said
"You transformed to something different"
I transcend the blackness that consumed me, I'm beyond it
Suddenly I, I ascend to denial
Without horns I fall from grace
A thousand nebula
I pass above the heavens
So let me feel divine again

Out of the dark, into the sun
I'm in a higher state of mind
A brand new start
I will transform into the fearless
A stronger force above the ground
The radiant era has begun
Out of the dark, into the sun
'Cause now I'm fearless
Out of the dark, into the sun
I'm in a higher state of mind
A brand new start
I will transform into the fearless
Out of the dark, into the sun
I'm in a higher state of mind
A brand new start
I will transform into the fearless
A stronger force above the ground
The radiant era has begun
Out of the dark, into the sun
'Cause now I'm fearless
