

# Amaranthe, Viral

(Now in the light of the screen you hide  
Halt like a pawn in a long long line  
Going up, going viral  
Going up, going viral)

Like we live in a world of deception  
On an earth that is going under  
Like we left all the truth and affection  
One turn in the wrong direction

I know we cannot bring the silence back  
Now the derelicts have one voice  
We're on overload  
As the final disease is going viral

Now, in the light of the screen you hide  
From the pain that you feel inside  
No one cares when we go down  
Going up, going viral

Halt, like a pawn in a long, long line  
As the virus spreads inside  
No one's there when we go down  
Going up, going viral  
(Going up, going viral)

We are born to abide from inception  
In a world that has lost all wonder  
Look around, then you see  
It's no doubt that we face extermination

I know we got to take the power back  
The authorities have no choice  
We are all aboard  
When the final disease is going viral

Now, in the light of the screen you hide  
From the pain that you feel inside  
No one cares when we go down  
Going up, going viral

Halt, like a pawn in a long, long line  
As the virus spreads inside  
No one's there when we go down  
Going up, going viral

All the pain you felt inside you  
In the light of the screen you hide  
Going viral

Now the virus spreads inside you  
Like a pawn in a long, long line  
Going viral

Halt, like a pawn in a long, long line  
As the virus spreads inside  
No one's there when we go down  
Going up, going viral

Now, in the light of the screen you hide  
From the pain that you feel inside  
No one cares when we go down  
Going up, going viral

Halt, like a pawn in a long, long line  
As the virus spreads inside  
No one's there when we go down  
Going up, going viral  
Going up, going viral
