## Anarbor, You And I

Without you, there's no reason for my story And when I'm with you I can always act the same

Forever, yeah if we're together

We can make it better

You and I

We never get to sleep we're up all day

We're overworked and under paid

You and I

We're always stuck in repeat day by day

Watching time drift away as we burn away

Without you, there's no reason for my story

And when I'm with you I can always act the same

Forever, yeah if we're together

We can make it better

You and I

We've never felt so right

That just might be just what I need (to get me through the night)

You and

We're the perfect fit you've got me hooked

So then I could never never quit, I just burn away

Without you, there's no reason for my story

And when I'm with you I can always act the same

Forever, yeah if we're together

We can make it better

Oh oh oh-oh oh-oh (x2)

Without you, there's no reason for my story

And when I'm with you I can always act the same

Forever, yeah if we're together

We can make it... We can make it...

(x2)

Without you, there's no reason for my story

And when I'm with you I can always act the same

Forever, yeah if we're together

We can make it better

Oh oh oh-oh oh-oh (x2)
