

Ateed, Come To Me

You're standing out in the rain
Trying to find the one to blame
Control and hope has been gone
To free your mind is a thing you should know

Ooh gotta let go
Ooh, you gotta let it go

Come to me come to me
Give you all that you need
What you want
What you feel
What you get
What is real (2x)

I know it's hard to be real
Sometimes when no one cares what you feel
But there's a thing you should know
Follow what you think and you will grow

Ooh gotta let go
Ooh you gotta let it go

Come to me come to me
Give you all that you need
What you want
What you feel
What you get
What is real (2x)

Come on, come on, come on
Come to me, yeah
Come on
Come over here

I know it's hard to be real
At times when no one cares what you feel

Oh gotta let go
Oh, you gotta let it go

Come to me come to me
Give you all that you need
What you want
What you feel
What you get
What is real (4x)
