Ateed, Come To Me

You're standing out in the rain
Trying to find the one to blame
Control and hope has been gone
To free your mind is a thing you should know

Ooh gotta let go Ooh, you gotta let it go

Come to me come to me Give you all that you need What you want What you feel What you get What is real (2x)

I know it's hard to be real Sometimes when no one cares what you feel But there's a thing you should know Follow what you think and you will grow

Ooh gotta let go Ooh you gotta let it go

Come to me come to me Give you all that you need What you want What you feel What you get What is real (2x)

Come on, come on, come on Come to me, yeah Come on Come over here

I know it's hard to be real At times when no one cares what you feel

Oh gotta let go Oh, you gotta let it go

Come to me come to me Give you all that you need What you want What you feel What you get What is real (4x)
