

# Atom And His Package, Before My Friends Do

I think I hope I die before my friends do  
Because the alternative makes my stomach hurt sometimes  
When I say "friends"; I mean family I like too  
The second tear friends I could horribly get through

Now my life has shame (on me now)  
This is not nostalgia, this is not the past  
And if it's gonna end external like a stupid car crash  
Regardless of my body, regardless of my weight  
Wouldn't it be nice if I could say  
"I won't change and you won't change, if we could both agree to stay the same  
Well then for once in this life I would not complain, if we could both agree to stay the same"

Let me tell you about this crazy list  
The best relative order of the people I know's deaths  
According to partners, handlings, etcetera, etcetera, etcetera, yeah  
So let's be safe because it's on me  
I have spacesuits for you and a spacesuit for me  
Spacesuits for everyone, spacesuits for everyone  
Spacesuits for everyone, spacesuits for everyone

This is not nostalgia, this is not the past  
And if it's gonna end external like a stupid car crash  
Regardless of my body, regardless of my weight  
Wouldn't it be stupid if I were to say  
"I won't change and you won't change, and we could both agree to stay the same  
Well then for once in this life I would not complain, if we could both agree to stay the same"

I hope I die before my friends do
