Atom And His Package, I, Professional Gambler

I have a strategy I don't think I have to get a real job That didn't work But I am confident That I am favored with overwhelming odds.

It is a system
It is straight mathematics
I need no more then 320 bucks.
If theres a 98% chance of giving you 320 I'm taking 325 of your bucks!

I got this beat I got this beat I got this beat Oh yeah Oh yeah

I got this beat I got this beat I got this beat Oh yeah Oh yeah

Mom, Dad don't look proud Is it because I'm a professional gambler now? I guess I don't need no college degree Just a brief lesson in communicative probability

I got this beat I got this beat I got this beat Oh yeah Oh yeah

I got this beat I got this beat I got this beat Oh yeah Oh yeah

(One mathematical question I have is: How long does it take three dudes to loose 200 bucks each?)

I got this beat I got this beat I got this beat Oh yeah Oh yeah

I got this beat I got this beat I got this beat Oh yeah Oh yeah
