

# Avril Lavigne, Eternally

You walk by, caught my eyes

Did you even notice?

That I've been just like this, only took one kiss

And then I start floating

You move closer to the edge

On your side of the bed

But I won't let you fall off tonight

Always, always I'll hold you tight

Baby, I want you for eternity (For eternity, eternity)

Make my dreams a reality (Reality, reality)

Write a list, tell me everything you want

Yeah, I don't give a shit if it's right or wrong

Baby, I want you eternity

Eternally

Waking up is so much easier with you by my side

And maybe me and you can play a game of seek and hide

You move closer to the edge

On your side of the bed

But I won't let you fall off tonight

Always, always I'll hold you tight

Baby, I want you for eternity (For eternity, eternity)

Make my dreams a reality (Reality, reality)

Write a list, tell me everything you want

Yeah, I don't give a shit if it's right or wrong

Baby, I want you eternity

Eternally

I see my future, we're together

You make everyday better

It's like I've known you forever

And ever, yeah

I see my future, we're together

You make everyday better

It's like I've known you forever

And ever

Baby, I want you for eternity (For eternity, eternity)

Make my dreams a reality (Reality, reality)

Write a list, tell me everything you want

Yeah, I don't give a shit if it's right or wrong

Baby, I want you eternity

Eternally
