

# Axxis, The Demons Are Calling

Light's above, shadows fly  
The night will show the signs in the sky  
A screaming noise, more and more  
Someone has opened the door  
Creatures crawl and spread about  
Black wings of night are beating deadly loud  
Flashing lights, eyes glow red  
Am I alive or am I dead  
When the demos are calling out my name  
In my dreams, my fever  
The demons are calling out my name  
The are grabbing and touching and burning  
They've captured my mind  
A fire burns in my mind  
Fading thoughts are living on behind  
Subconscious will be dangerzone  
Now I reap all the seeds I've sown  
Creatures claws at my neck  
Drag their nails across my back  
Dreams at night don't disappear  
It was more than flesh and blood could bear  
When the demos are calling out my name  
In my dreams, my fever  
The demons are calling out my name  
The are grabbing and touching and burning  
They've captured my mind  
Creatures crawl, spread about  
A screaming noise, deadly loud  
An open door, the gate of hell  
They're breaking out, hear them yell:  
We come - We kill - We fight - Now  
When the demos are calling out my name  
In my dreams, my fever  
The demons are calling out my name  
The are grabbing and touching and burning  
Like a flame - Like a flame  
Grabbing, touching, burning  
Still in my mind
