Systems go  
Satellite, Satellite  
Minus 10  
Twilight, Twilight  
I feel the moon  
Pulling me away  
Into the blue  
Of the midnight sky  
If you can do  
You and I can do  
Things they into  
Just feel the vibe  
So can we get a systems go  
And blast off like a  
Satellite, satellite  
Long till the minus 10 [T minus 10]  
Headed straight to the  
Twilight Twilight  
So can we get a systems go  
And blast off like a  
Satellite, satellite  
Long till the minus 10 [T minus 10]  
Headed straight for the  
Twilight Twilight  
Well as Im headed to the sky way up above me  
I feel my body spinning feeling free and lovely  
I am the rumblin sea so come with me  
On this midnight vibe  
And you can feel it if you tune into your radio  
Look at the sky look at the moon look at the way it glow  
I aint no ghost so dont be afraid to go  
On this midnight vibe  
So can we get a systems go  
And blast off like a  
Satellite, satellite  
Long till the minus 10 [T minus 10]  
Headed straight to the

So can we get a systems go  
And blast off like a  
Satellite, satellite  
Long till the minus 10 [T minus 10]  
Headed straight for the  
Twilight Twilight  
Like an astronaut floating off into the beyond  
Enterin into dimensions no one has ever yet seen before  
I do not need an engine I can ascend into the dark  
Remember a dream is never a dream is never a dream [is never a dream y'all]  
Midnight vibe  
So can we get a systems go  
And blast off like a  
Satellite, satellite  
Long till the minus 10 [T minus 10]
