

B-OK, Live it up (feat. Roksana Węgiel - Roxie, K

we keep our eyes on the headlights
got your hand and it feels right
to drive sway in a runaway car

like a ride on the wild side
you're the fuel when I am run down
don't be scared
you just let them talk

and we've been
over our heads
with what we got
they say get over
yourselves
but we can't stop

they live a 1000 lies
the truth is ours
so baby tell they'll never
tell they'll never know
oh-oh

you and I
we were made to Live It Up
this I will never give it up
give it up
I don't know why
but you taking me higher
it's true that
you and I
we were made to Live It Up
Live It Up

Live It Up
Live It Up

we keep our eyes on the headlights
got your hand and it feels right
to drive sway in a runaway car

like a ride on the wild side
you're the fuel when I am run down
don't be scared
you just let them talk

and we've been
over our heads
with what we got
they say get over yourselves
but we can't stop

they live a 1000 lies
the truth is ours
so baby tell they'll never
tell they'll never know
oh-oh

you and I
we were made to Live It Up
this I will never give it up
give it up
I don't know why
but you taking me higher
it's true that

you and I
we were made to Live It Up
Live It Up

Live It Up
Live It Up

get lost in the midnight air
so good when you're right here
don't wanna be anywhere else right now

wanna right with you all day
I know it's gonna b-ok
whne the world gets way too loud

and we've been
over our heads
with what we got
they say get over yourselves
but we can't stop

they live a 1000 lies
the truth is ours
so baby tell they'll never
tell they'll never know
oh-oh

you and I
we were made to Live It Up
this I will never give it up
give it up
I don't know why
but you taking me higher
it's true that
you and I
we were made to Live It Up
Live It Up

Live It Up
Live It Up

you and I
we were made to Live It Up
this I will never give it up
give it up
I don't know why
but you taking me higher
it's true that
you and I
we were made to Live It Up
Live It Up

Live It Up
Live It Up
