Bad Boys Blue, I

When youre next to me. It feels so heavenly.

Oh ask me anything. And baby I get chills, yes I will.

You came. And turned me upside down.

Oh baby you turned my life around.

Around in just one night.

And III be good, III be good, III be true.

Whatever you might need I would do.

And III be good and I swear.

Ill be there - every single minute in my life.

And III be good, III be good.

If I could Id get for you the stars from above.

And what I do. I just do it for you.

Im longing for your love.

I want you right here by my side.

I want your love until the end of time.

And III be good, be good to you.

And you know its true.

You control my mind. Stick inside my head.

Thats why I have no say. My heart decides instead but I feel glad.

You came. And turned me upside down.

Oh baby you turned my life around.

Around in just one night.

And III be good, III be good, III be true.

Whatever you might need I would do.

And III be good and I swear.

Ill be there - every single minute in my life.

And III be good, Ill be good.

If I could Id get for you the stars from above.

And what I do. I just do it for you.

Im longing for your love.

I want you right here by my side.

I want your love until the end of time.

And III be good, be good to you.

And you know its true.
