

Balligomingo, New Favorite Thing(Ft Lucy Woodward)

You came out of nowhere
A welcome distraction
A sight for my sore eyes
A most special attraction
You saved me
Oh don't you know

You're my
New favorite thing
Now I don't need anything else you're my
New favorite thing
Makes me feel like I've never felt before
New favorite thing
I want you more and more and more

Like honey on my tongue
You melt and explore me
Where did you come from
Say you adore me
Oh baby don't let me go

You're my
New favorite thing
Now I don't need anything else you're my
New favorite thing
Makes me feel like I've never felt before
New favorite thing
I want you more and more and more

You make me feel like such a girl
Again
It's been a long time
Yeah it's been a long time

New favorite thing
Now I don't need anything else you're my
New favorite thing
Makes me feel like I've never felt before
New favorite thing
'Cuz I want you more and more and more
More and more and more
More and more and more
