

Bananarama, The Wild Life

What your mother don't know, she won't mind
Her good advice was a waste of time
You wanna live fast, cutting it fine
Make hay while the sun shines
No one there to say, you're wrong or right
You've waited a lifetime
Burning all your bridges tonight
This is the wild life
It's the wild life
Wild life
This is the wild life
No stone left unturned
Jump in the fire you're gonna get burned
You might lose your way
When you come out to play the wild life
I may be too young but I've seen and done
Everything that they say is fun
I gotta find out for myself
In the end there's no one else
Every time I try to win I lose
I'm tired of waiting
Now I'm gonna make my own rules
This is the wild life
It's the wild life
Wild life
This is the wild life
No stone left unturned
Jump in the fire you're gonna get burned
You might lose your way
When you come out to play the wild life
No one there to say you're wrong or right
You've waited a lifetime
Burning all your bridges tonight
This is the wild life
It's the wild life
Wild life
This is the wild life
No stone left unturned
Jump in the fire you're gonna get burned
You might lose your way
When you come out to play the wild life
