

Bars And Melody, Thousand Years

Distance won't destroy us
Our hearts will only grow fonder
The absence of each other
Will only keep our love stronger

We share the moon
We share the stars
We taste the tears
We bear the scars

A 1000 years
I'd run to you
There's not a thing
I wouldn't do

I know this pain won't last
We can leave it all in the past
I would give my life for you
Just for another chance

A 1000 years
A 1000 miles
Across the world
Just to see you smile

You've been away
For way too long
I need your love just to keep me strong

Every day when I'm with you
I lose my mind
But I will wait forever girl
True love is hard to find

A 1000 years erase the time
I'll wait forever just to make you mine

Time won't destroy us
Our hearts will only grow older
The absence of each other
Will never make our love colder

I stare down the sun
I part every sea
I break the curse
The put on us
And the we cloud be free

I tear down these walls
And open up my heart
For that would be the day it all fell apart

A 1000 years
A 1000 miles
Across the world
Just to see you smile

You've been away
For way too long
I need your love just to keep me strong

I would never rest
No I will never fall
Until I see your face

I will fight right through it all

A 1000 years erase the time

I'll wait forever just to make you mine
