

Bebe Rexha, Atmosphere

[Verse 1]

I feel in the beginning when we're living
We were tripping, we were so high
When you tell me that you love me were you bluffin'?
Was it nothing? Now you're so dry
You can tell me that you're sorry
But I know that you don't mean it, baby, don't lie
Don't lie, baby, don't lie

[Pre-Chorus]

And I can't blame myself
For getting lost inside the promise of you
And I can't blame you leaving
'Cause what's meant to be will always be true

[Chorus]

There isn't enough love in the atmosphere
To keep you here, ahh
There isn't enough love in the atmosphere
Don't leave me here, all alone
I ride for my baby
I died for my baby
I'd die for my baby, no lie
There isn't enough love in the atmosphere
In the atmosphere

[Verse 2]

Remember we were running up and down
And getting messy in the hallways
Told me that forever was the time we'd be together, baby, always
Now you're saying that you're sorry
But I know that you don't mean it 'cause you won't stay
No you won't stay, you won't stay

[Pre-Chorus]

And I can't blame myself
For getting lost inside the promise of you
And I can't blame you leaving
'Cause what's meant to be will always be true

[Chorus]

There isn't enough love in the atmosphere
To keep you here, ahh
There isn't enough love in the atmosphere
Don't leave me here, all alone
I ride for my baby
I died for my baby
I'd die for my baby, no lie
There isn't enough love in the atmosphere
In the atmosphere

[Bridge]

If there's winners and losers, then I'll be the loser
I'm still here, I choose ya
I don't want another, if we can't have each other
'Cause baby, I love ya
Maybe in a different world, baby, I could be your girl
Maybe then I'll be with you
If there's winners and losers, then I'll be the loser
I'm still here, I choose ya

[Chorus]

There isn't enough love in the atmosphere
To keep you here, ahh

There isn't enough love in the atmosphere
Don't leave me here, all alone
I ride for my baby
I died for my baby
I'd die for my baby, no lie
There isn't enough love in the atmosphere
In the atmosphere
