

Ben Kenney, Wrong

Where did this all go wrong?

Was I missing it all along?

Is it coincidence that the craziest fools have the strongest belief that they're right

Without all due respect there's a three headed monster that's eating your children alive

Where did this all go wrong?

Was I missing it all along?

Every single day

I have less and less to say

Are you so sure you're right?

Do you say things beyond your sight?

Well, is it safe to assume that the greatest unknown is inside you and forcing your hand

Do you feel warm inside when you think about cussing the things you don't understand

Every single day

I have less and less to say

Every single day

I have less and less to say

Where did this all go wrong?

Was I missing it all along?
