

# Beyoncé, All Up In Your Mind

I tried to get all up in your mind  
It stops at a crime that I wanna make you mine  
I tried to get all up in your mind  
I'm going through the time if it means I'll make you mine  
My eyes, yeah, I really like your smile  
It stops the time, yeah, I stay here for a while  
You give me that real good feeling that I need  
Be careful what you ask for 'cause I just might comply

You need a real wild girl  
You need me on your deviants, it's gon' take a little work  
It's uncertain that I'ma say those three words  
Yes, I do, I think it's true, I just know I love you (Gon' make you mine, mine)  
Tell mama that I'd do it for you  
The rider always want you, I'll be groupie for you  
You may heard it first 'cause I'ma make it work  
Put me first is what you need I know you're gonna love me (Gon' make you mine, mine)

I tried to get all up in your mind  
Is my love a crime 'cause I wanna make you mine  
I tried to get all up in your mind  
I'm going through the time if it means I'll make you mine  
My eyes, yeah, they really like your smile  
It stops the time, yeah, I stay here for a while  
You give me that really good feeling that I need  
Why don't you take the time to really notice me?

You need that really wild one  
I knew that you can't live without her  
He know I'm a fucking problem  
I knew that I could get it out of him  
I know I love you, tell mama I'd do it for you  
My eyes behold you, this candy always want you  
I'm the only one for you

I tried to get all up in your mind  
It stops at a crime and I'm gonna make you mine  
I tried to get all up in your mind  
I'm going through the time if it means I'll make you mine  
My eyes, yeah, they like your smile  
It stops the time, yeah, I stay here for a while  
You give me that real good feeling that I need  
Why don't you take the time to really notice me?  
I tried to get all up in your mind  
It stops at a crime and I'm gonna make you mine  
I tried to get all up in your mind  
Be careful what you ask for 'cause I just might comply
