

Beyoncé, Standing On The Sun

My body is magnified
In the sun set me alive
My body, is yours tonight
Burn me up, set me alive

I can't deny, your desire
Feel like I'm on fire
When you touch me
I feel the flame
And I kiss you, while the sun kisses me

Can you feel the heat on my skin
Can you feel all my loving
You and me, we're standing on the sun
Can you feel my heart burning
Make you feel all my good loving
You and me, we're standing on the sun

We're standing on the sun
We're standing on the sun
We're standing on the sun

Don't play with me
Kissing, they wanna get close when I see you
I know hot to handle, baby you
Know that work it
And give you some of that run it
Bet you think that it's just perfect
Because it's your day [..]
Oh shit, made you see it
Big stop pleasure, food, sangria
Hay caliendo

There's only one thing on my mind
I want to love you long time
Want you to work me while I whine
Want you to love me long time
We're just having such a good time
Over and over we whine

Kiss you, while the sun kisses me

Can you feel the heat on my skin
Can you feel all my loving
You and me, we're standing on the sun
Can you feel my heart burning
Make you feel all my good loving
You and me, we're standing on the sun

We're standing on the sun
We're standing on the sun
We're standing on the sun

Can you feel the heat on my skin
Can you feel all my loving
You and me, we're standing on the sun
Can you feel my heart burning
Make you feel all my good loving
You and me, we're standing on the sun

We're standing on the sun
We're standing on the sun
We're standing on the sun
