

Billy "Crash" Craddock, She Could

(She could)

If anyone could make me happy she could satisfy me or deny me she could
She could treat me good or bad make me smile or make me sad
Take every bit of love I had she could
If anyone could tie me down oh she could build me up or bring me down she could
She could make me laugh or cry want to live or want to die
And loving her's the reason why she could
The things we do in the name of love I'll never understand
Like the ways of a woman or the weakness of a man
For she can make me laugh or cry make me live or want to die
And loving her's the reason why she could
For she can make me laugh or cry...
