

# Birdy, Standing In The Way Of The Light

Through the driving rain  
I have lost the words  
To piece us back together  
To tell you how it hurts  
'Cause lately we've been breaking  
All we've built so far  
And I'm tired of sitting waiting  
Alone in the dark

There's still a way to make it right  
We'll find the strength this time

And pull back this veil  
Turn night into day  
Don't you know you're standing in the way of the light?  
Pour oil on these flames  
Speed up my heart again  
Don't you know you're standing in the way of the light?

Round we go in circles  
Does it have to be this hard?  
We can stop the fighting  
If you let down your guard

There's still a way to make it right  
We'll find the strength this time

And pull back this veil  
Turn night into day  
Don't you know you're standing in the way of the light?  
Pour oil on these flames  
Speed up my heart again  
Don't you know you're standing in the way of the light?

So come on, come on, come on  
We've been living in the shadows too long  
So come on, come on, come on

Just pull back this veil  
Turn night into day  
Don't you know you're standing in the way of the light?  
Pour oil on these flames  
Speed up my heart again  
Don't you know you're standing in the way of the light?

You're standing in the way of the light
