## Blinker The Star, On This Earth

On this earth I will stand on rocks and sand Waiting for sympathy and day's end To winter, spring and summer I swear there is no other you This is for you One life fades to the next It's with me you're left Tired eyes, please believe That I'm with you To Shiela, surely altered Your train wreck's racing for we two Is this what we do? On this, our night, there will be Secrets left unknown Can you be strong?
