

# Bobaflex, Family

Mother was a caterpillar  
You should have seen her cocoon  
But wait theres much much more  
She'll be breaking out in time  
She'll be different too  
More powerful than before  
Now she's got dragon wings  
And she hunts and eats human beings  
But I love her anyways because she's my ma  
They're all part of my family  
You can't break our unity  
They're all part of my family  
You can't break our unity  
Their strange  
But we share the same blood  
No matter where you run  
Don't forget where you come from  
My brother has no physical form  
He is just, pure thought  
He dances in your mind  
We speak through through telepathy  
And when you're sleeping in the night  
And he hates to be ignored  
Now he screams inside me dreams  
Says he'll erase all of my memories  
Unless he gets the attention he needs  
They're all part of my family  
You can't break our unity  
They're all part of my family  
You can't break our unity  
Their strange  
But we share the same blood  
No matter where you run  
Don't forget where you come from  
Father was a shape shifter  
He used to play tricks on us kid  
By hiding under beds  
And I know whats on his face  
Because its on my mind  
Those eyes of burning red  
And the devil stands in front of me  
Cause I guess that's what I want to see  
But I love him anyways cause he's my pa  
They're all part of my family  
You can't break our unity  
They're all part of my family  
You can't break our unity  
Their strange  
But we share the same blood  
No matter where you run  
Don't forget where you come from
