

# Bon Jovi, Fear

I see you looking over your shoulder  
Tell me who do you think's out there  
You're reaching for your four leaf clover  
But baby there ain't no luck down there  
I swear that there's no heart in this city  
It's here the slogan reads  
"Do your time" everybody's doing  
their sentence  
It's just there ain't nobody here  
Who knows just what's the crime  
I watched my father live a lie here  
I'd rather die than fade away  
I read the rules  
And yeah I know them  
Still you ain't ever gonna  
Make me play the game of  
Fear  
Fear  
Fear  
Fear  
Running with the rats  
Through the city  
Makes you feel like you're  
A partner in crime  
Girl once you won't stop to watch  
That little girl did  
Hey baby won't you stop and hear me  
Just being here we're  
breathing heart attacks  
We can run and chase  
The setting sun we can run  
And we won't ever look back  
Take my hand I know we'll make it  
I'll let nothing slow us down  
I know you want to curse  
This place but there's only  
One thing that's stopping us now  
Fear fear fear  
Of a new thing  
Fear fear fear  
Of the brass ring  
You ain't one for taking chances  
You work and live and breathe that 9 to 5  
Still that's what you call living  
That's surviving to me  
And surviving is living to die in  
Fear
