

# BONES, CtrlAltDelete

[Intro]

Once I hit you with that backspace, you ain't comin' back  
Ctrl + Alt + Delete you, give me space like tab  
Once I hit you with that backspace

[Verse]

Used to be on Booth St., seeing 2D  
Now we do 3, 1080 HD  
Go press the AC, yelling like it hate me  
When the sun start screaming, I let my ice save me  
I put it on and my temperature dropping  
Father time diamonds, press pause and they stop ya'  
Cryogenic pendants, I'ma be the last fossil  
Now for my next trick I will die proper  
Loaded my duffel with these blades and they just got polished  
Thinking 'bout the day bring me nothing but solace  
Runnin' up with that, fuck it, I'm glad that I left my baggage  
They all asked if it happened, replied with laughter  
Never one to banter, I wanna up the ante  
Every day I take the standard and put it where they can't see  
Forever where they can't be, never understand me  
I'd rather be the one they hate than the one they think is friendly  
Dot zip the competition if there ever was any  
Drag to the trash, ash, then I right-click empty  
You can't edit this body, all these layers are locked away  
Told them System 32 is something they don't need to operate  
System's frozen, now everybody hate me  
Nothing new to me, I'm used to it thankfully  
Reboot text, yes, you can all thank me  
I am the virus that got your heart racing

[Chorus]

Once I hit you with that backspace, you ain't comin' back  
Ctrl + Alt + Delete you, give me space like tab  
(Once I hit you with that backspace, you ain't comin' back  
Ctrl + Alt + Delete you, give me space like tab)  
Once I hit you with that backspace, you ain't comin' back  
Ctrl + Alt + Delete you, give me space like tab  
(Sesh)
