

# Brand New, Could Never Be Heaven

Do you know the words that make the hidden door open?  
Can you speak my secret name and fix me?  
I have no heart, I have no brain  
Lord I have no courage  
Can you get me home again?

Could never be heaven without you  
Could never be heaven without you  
Never be heaven without you

I was drowning in the lake dammed  
Over a dead mining town  
The cars and the homes lay still in the water  
The deeper I sank, the less I died  
The trees swayed, slower the the tide  
There were people I love below me singing

And all of the songs were about you  
And all of the songs were about you  
And all of the songs were about you

Winds will be heard  
Swimming circles in the church  
A cardinal fair says "God is dead"  
Well said  
Get out of my head  
Get out of my head  
Get out of my head

You are not alone  
We are not separate  
My daughter's shoulders are my shoulders  
My son's hands my hands  
My wife's heart my own heart  
I've heard the outer darkness is really nice this time of year

Could never be heaven without you  
Never be heaven without you  
Never be heaven without  
It'd never be heaven without you  
Never be heaven without you  
Never be heaven without you
