## Bullet For My Valentine, Rainbow Veins

Body shakes I got rainbows running through my veins And now I just can't comedown Flying high I'm still drowning in the chemicals And now I just can't comedown Diving head first into a black hole Becoming unstable mentally I'm tryin hard to ride these tidal waves Of unfiltered ecstasy

Another day but I don't wanna face it Oh oh oh oh oh oh I wanna heal so I'm self-medicating And I don't wanna feel it now Another day but I don't wanna face it Another dose just to keep me sedated

And let reality float away Body shakes i got rainbows running through my veins And now i just can't comedown Sinking deeper into a pit of snakes As they dance to the melody I got a time bomb ticking in my chest That's never felt so heavenly Tyake m ove the Edge Don't wanna stop And me notr coming down again Take me further away Not gonna stop And i am never gonna be the same
