

Bullet For My Valentine, Road To Nowhere

Tired and lonely still we stand
On a road to nowhere
Trapped in a world of endless days, my engine's starting
(Road to nowhere)
Body and mind are breaking down
On a road to nowhere
Destiny silence, here no sound as away forever?

Farewell, I miss you
I'm sick of these good byes
Cause it torn us appart, right from the start
I miss you

Feelings that filled me left me cold
On this road to nowhere
(Road to Nowhere)
Dreams are my saviors, save me now, cause I know I'm fallin' (Oh yes)

Farewell, I miss you
I'm sick of these good byes
Cause it torn us appart, right from the start
I miss you

Candles burn slowly, flames shine so brightly
Light in the darkness, save me from madness again

Only the lonely, can possibly know me
Here keep sun rising, fire encause me again

KEEP SUN RISING

Farewell, I miss you
I'm sick of these good byes
Cause it torn us appart, right from the start
I miss you

Farewell, I miss you
I'm sick of these good byes
Cause it torn us appart, right from the start
I miss you
