

Carla Fernandes, Jungle

say my name like you really want it
cos you know you know I like that

play it cool
I am not begging for it
cos you know
I am not the type to

we got some business still unfinished
so much left here to explore
I like this feelings its contagious
I want some more

don't keep me waiting
you know I am so impatient
infatuated
don't stop

(let's go!)
pull me close now you're in my head
and it feels so wild like a jungle

do those things like the sun don't set
and it feels so wild like a jungle

keep me up like that won't forget
you know that you're making me want you

(and it feels so wild like a jungle)

I don't this for anybody
but whit you I just can't help myself
cos boy, you drive me crazy
and you got me thinking lately that I need a little more of your help

we got some business still unfinished
so much left here to explore
I like this feelings its contagious
I want some more
