

Carly Rae Jepsen, Western Wind

California

It crossed my mind

Once we were pressed into the

Love we were pressed into the breeze up on the mountain

I was by your side

Do you remember

A conversation

With our heads against the pillow?

Dust my shoes before I enter through your doorstep

I was on your side

Coming in like a western wind

Do you feel home from all directions

First bloom, you know it's spring

Reminding me love that it's all connected

Coming in like a western wind

A jubilation

A celebration

Take me back into your corner

To the center of the room we made a dance floor

I was charmed to let go

Coming in like a western wind

Do you feel home from all directions

First bloom, you know it's spring

Reminding me love that it's all connected

Coming in like a western wind

But could you give me peace of mind

If I return to you in time

My golden arrow

Coming in like a western wind

Do you feel home from all directions

First bloom, you know it's spring

Reminding me love that it's all connected

Coming in like a western wind

Coming in like a western wind

Do you feel home from all directions

First bloom, you know it's spring

Reminding me love that it's all connected

Coming in like a western wind

Coming in like a western wind

Do you feel home from all directions

First bloom, you know it's spring

Reminding me love that it's all connected

Coming in like a western wind
