

# Celine Dion, Right In Front Of You

Life, it can twist your heart  
Put you in the dark  
I was cold and lonely  
Doubt, it can close you in  
Build the walls within  
I let fear control me  
And that girl didn't know  
Where the answer would be  
Right in front of you  
Right in front of me  
We were looking for it somehow  
Somewhere we couldn't see  
But the love was always there  
It's been around us everywhere  
I had to fall to finally see  
That you were right in front of me  
Faith, it can lift you up  
And if you got enough  
To reach a new beginning  
Love, can withstand strong  
In the final hour  
We'll find the joy in living  
Don't let go  
Cause that I know  
Pretty soon you will see  
Right in front of you  
Right in front of me  
We were looking for it somehow  
Somewhere we couldn't see  
But the love was always there  
It's been around us everywhere  
I had to fall to finally see  
That you were right in front of me  
You are my tomorrow  
There's safety in your arms  
Where you'll go I'll follow  
'Cause you're the world where I belong  
Right in front of you  
In front of me  
Somehow we couldn't see  
Right in front of you  
I had to fall to finally see  
Right in front of you  
Right in front of me  
We were looking for it somehow  
Somewhere we couldn't see  
But the love was always there  
Surrounding us everywhere  
I had to fall to finally see  
Right in front of you  
Right in front of me  
We were looking for it somehow  
Somewhere we couldn't see  
But the love was always there  
Surrounding us everywhere  
I had to fall to finally see  
That you were right in front of me  
I finally see yeah  
I had to fall to finally see  
That you were right in front of me
