

Central Cee, Little Bit Of This

Little bit of that

Come alive at night and let's see how you shake that back

Vibrate, let's see how you make that

Little bit of this, little bit of that

(You are now listening to Young Chencs)

Li-little bit of this, little bit of that (Little bit of that)

Come alive at night and let's see how you shake that back

Vibrate, let's see how you make that clap

Li-little bit of this, little bit of that (Little bit of that)

Come alive at night and let's see how you shake that back

Vibrate, let's see how you make that clap

No doubt in my mind that my time will come

All I done was stick to the grind

Bro-bro got the darg parked off

It's willing to bark if it gets outta line

On my line, she wanna complain all the time

Goodbye, I deleted that bitch off my line

I'm on my job, I'm occupied

But I do a bit of this on the side

Li-little bit of this, little bit of that (Little bit of that)

Come alive at night and let's see how you shake that back

Vibrate, let's see how you make that clap

Li-little bit of this, little bit of that (Little bit of that)

Come alive at night and let's see how you shake that back

Vibrate, let's see how you make that clap

Shake that back like a video vixen

Back out the rod like, "Let's go fishin'"

Oh that's y-, oh that's your missus

Send her a cab and make her go missin'

She wanna spend a day in the life with me and my guy

Bring a friend for a friend

Short and sweet, she's five foot five

With the curly hair, she a ten outta ten

The way that it's clappin' I'm fascinated

Matter fact, I'm infatuated

Bend her back, she elasticated

Killed the pumpum, assassinated

Hmm, I'm activated

You-you-you got the vibe just right

Come alive at night, I'm on demon time

She don't trust man, I got no reason to lie

Li-little bit of this, little bit of that (Little bit of that)

Come alive at night and let's see how you shake that back

Vibrate, let's see how you make that clap

Li-little bit of this, little bit of that (Little bit of that)

Come alive at night and let's see how you shake that back

Vibrate, let's see how you make that clap

The way that it's clappin' I'm fascinated

Matter fact, I'm infatuated

Bend her back, she elasticated

Killed the pumpum, assassinated

Hmm, I'm activated

You got the vibe just right

Come alive at night, I'm on demon time

She don't trust man, I got no reason to lie

Four bad, four bad Bs in the ride

Got a squeeze them, it's a wee bit tight

Mostly female, the deceivin' type
Take the Ps and then go leave them guys
What you doin' in the AM?
You only ever holler in the evening time
I'm here for a good time, not a long time
Can you keep it quiet?
She wanna spend a day in the life with me and my guy
Bring a friend for a friend
Short and sweet, she's five foot five
With the curly hair, she a ten outta ten

Li-little bit of this, little bit of that (Little bit of that)
Come alive at night and let's see how you shake that back
Vibrate, let's see how you make that clap
Li-little bit of this, little bit of that (Little bit of that)
Come alive at night and let's see how you shake that back
Vibrate, let's see how you make that clap

Come alive at night
Little bit of this, little bit of that
