Charlie Puth, If You Leave Me Now (feat. Boyz II

No, this is not goodbye
I swear that 'm gonna change
no, baby, please don't cry
it doesn't have to end this way

cause when I think of all the night I'll be alone
I get terrified
please don't say goodbye

cause, girl, if you leave me now
if you give it up and just walk right out
you will take the biggest part of me
and all the things that I believe
baby, if you leave me now

when did we lose our way?
my whole world was unravelling
and girls driving me insane
there's no road for the traveling

when I think about all of the nights you're gone
I get terrified
please don't say goodbye

cause, girl, if you leave me now
if you give it up and just walk right out
you will take the biggest part of me
and all the things that I believe
baby, if you leave me now

I can promise if we pretend
and if you left me brokenhearted
every singhe night
I'll think about you with someone else
baby, if you leave me

baby, if you leave me now
if you give it up and just walk tight out
you will take a biggest part of me
and all the things that I believe
if you leave me now
oh baby if you leave me now
you will take a biggest part of me
and all the things that I believe

cause, girl, if you leave me now
if you give it up and just walk right out
you will take the biggest part of me
and all the things that I believe
baby, if you leave me now
