

# Chiasm, Chosen Fate

Unborn I feed on you alone  
When will my soul become my own?  
Soon I'll awake the world to see  
Learning a false reality

I'm left with no escape  
Won't live with chosen fate  
Existence is a fraud  
Who says we should play God?  
The future is at stake  
A new life to awake  
A life of every wish  
Perfection for the rich  
Attempt to fight disease  
And put our souls at ease  
Programmed lethality  
Destroyed mortality

Unborn I feed on you alone  
When will my soul become my own?  
Soon I'll awake the world to see  
Learning a false reality

I'm left with no escape  
Won't live with chosen fate  
Existence is a fraud  
Who says we should play God?  
I'm left with no escape  
Won't live with chosen fate  
This time we are too late  
There's no time left to wait  
Genetic engineer  
What could there be to fear?  
Biotechnology  
Our new theology

Created by our skill  
What happened to free will?  
Specific role to fill  
Still not allowed to kill

The future is at stake  
A new life to awake  
I'm left with no escape  
Won't live with chosen fate
