

Chojnacki &, My summer night

My Summer Night

Summer night - my summer, summer's night,
It seems so right - a challenge in the air,
Sounds and smells and sights and girls - it's electrical,
And in a crowd - my miss world - she is magical, chemical

Summer night - just another summer's night,
I feel so light as the music in the air,
And when I see your big, green eyes
glowing back at me
Mmmm... a knowing in your smile
only I can see, instantly...

Let me take you far away from bright lights,
Take a walk on a moonlit beach and stay out of sight,
Let me take you far away from bright lights,
Make it a special night - I wanna do it right

Summer night, now she's my summer day and night
It's late-July as a cool breeze sways your hair
I didn't sleep too much last night but I'm energized
I couldn't want another prize - I am mesmerized... and hypnotized

Let me take you far away from bright lights,
Take a walk on a moonlit beach and stay out of sight,
Let me take you far away from bright lights,
Make it a special night - I wanna do it right

Let me take you far away from bright lights,
Take a walk on a moonlit beach and stay out of sight,
Let me take you far away from bright lights,
Make it a special night - I wanna do it right
