

Christina Grimmie, Little Girl

little girl, don't you cry
everything will be alright
little girl, open your eyes
the sun will shine after tonight

little girl, I got you
in my arms there's nothing new
come out of you shell
listen to me tell you

little girl, I'm here to say
don't run away
little girl, I know you're scared
the things you bear
si let me
tell you you're ok.
they you're in my arms to stay
little girl

little girl, wipe your tears
darkness ran, don't have to fear
little girl, clear your mind
and think of my love this time

did you save the longer days
but night has fallen
lost your way
little girl, the morning's gone
the sky is lit with dawn

little girl, I'm here to say
don't run away
little girl, I know you're scared
the things you bear
si let me
tell you you're ok.
they you're in my arms to stay

the walls I've built protect me from fully soar
I hope for the best you tell me
I'm strong

little girl, I'm here to say
don't run away
little girl, I know you're scared
the things you bear
si let me
tell you you're ok.
they you're in my arms to stay
