

# Clödie, Dusk Till Dawn

I wake up in your arms  
And see the morning sun  
You're still asleep  
Your breath on me  
That's what I love to feel  
You always say to me  
"You know what we should do?"  
To see the world  
Take the car  
And travel far away  
This huge and crazy world  
That makes your dreams come true  
And this wild ride that makes you fly  
Reminds me of you

I'll be here, next to you  
Dusk till dawn  
Come to me  
Grab my hand and we're gone  
Close your eyes  
And see the better day  
We watch the lights  
And music starts to play

In every high and low  
You have to play your part  
Just trust your heart  
See the signs  
And follow 'long the way  
It is beautiful  
No matter what they say  
You fight each war  
Staying strong  
Winning every day  
You are the air I breathe  
The better part of me  
Make me smile, feel alive  
Perfect as you are

I'll be here, next to you  
Dusk till dawn  
Come to me  
Grab my hand and we're gone  
Close your eyes  
And see the better day  
We watch the lights  
And music starts to play

I stay with you until I die  
Spread our wings and we will fly  
You and I feel alive  
It's the fire burning in our hearts

I'll be here, next to you  
Dusk till dawn  
Just grab my hand and we are gone  
Close your eyes  
And see the better day  
We watch the lights  
And music starts to play

The night returns  
And next to you I lay
