

# Close To Home, Fake It Til You Make It

We got this far on lies and secrets  
Then fell apart at the seams  
Now in these places, these empty spaces  
We learn to, we learn to breathe

Right now, is the only time you'll ever be given  
To find all the answers in this empty life that you've been living  
So make a stand, this is your life in your hands  
We wont break or bend!  
Tear down the walls that held you in  
And start it over again

Forget your darker days, they're over now!

We got this far on lies and secrets  
Then fell apart at the seams  
Now in these places, these empty spaces  
We learn to, we learn to breathe

I refuse, to suffer for your selfish mistakes!  
There's consequences to your actions more than your dreams at stake!  
I'll make a stand, take my life in my hands!  
We wont let this end!  
Dream up a future, make it happen!  
And follow your plans!

Forget those darker days, they're over now!

We got this far on lies and secrets  
Then fell apart at the seams  
Now in these places, these empty spaces  
We learn to, we learn to breathe

We learn to breathe, we'll take a chance!  
We'll start it over again, forget the past!  
We'll blaze a path, these lights will lead the way!  
The darker days just fell behind cause better times are rising!  
Tear down the walls, just push on through, this life belongs to you!

We got this far, we got this far  
This far...  
We got this far, we got this far  
This far...

we got this far on lies and secrets  
Then fell apart at the seams  
Now in these places, these empty spaces  
we learn to, we learn to breathe
